1

Executive Summary

This report presents a comprehensive analysis of the HR employee dataset comprising **689 employees** across **5 countries**, **5 operational centers**, and **20 departments**. The analysis covers workforce composition, compensation benchmarking, overtime patterns, leave utilization, and seniority distribution.

1

Headline

KPIs

Key Insights

- The workforce is **young in tenure** — over 70% of employees have been with the organisation for 2 years or fewer, suggesting either rapid growth or elevated turnover worth monitoring.
- **Sick leave affects nearly half** of all staff (46.3%), which is notably high and warrants a wellness programme review.
- The **gender pay gap is negligible** at just \$14/month (<1% of average salary), reflecting equitable compensation practices.
- **Major Mfg Projects** shows the highest average overtime at 38.6 hours — nearly double the next department — indicating a structural resource deficit.
- **Human Resources** is the highest-paying department (\$2,556/mo avg), while **Research Center** sits lowest at \$1,887/mo.

1

Workforce Composition

1

Gender

Distribution

The organisation’s workforce skews male, with **449 male employees (65.2%)** and **240 female employees (34.8%)**. While this imbalance may reflect sector norms in manufacturing and engineering-heavy roles, leadership should assess whether it persists across seniority levels.

1

Geographic

Distribution

Country	Employees	Share	Cumulative
Egypt	379	55.0%	55.0%
United Arab Emirates	156	22.6%	77.6%
Saudi Arabia	90	13.1%	90.7%
Syria	53	7.7%	98.4%
Lebanon	11	1.6%	100.0%
Total	689	100%	

Egypt is the dominant employment hub, hosting over half the workforce. UAE and Saudi Arabia together account for a further 36%, establishing the Gulf region as a significant operational footprint.

1

Center

Distribution

Center	Employees	Share
Main	251	36.4%
North	207	30.0%
West	119	17.3%
South	65	9.4%
East	47	6.8%

1

Headcount

by Department

The top five departments by headcount account for **438 employees (63.6%)** of the total workforce, with Manufacturing alone representing 20.3%.

Department	Employees	Share	Avg Salary (\$)
Manufacturing	140	20.3%	2,100
Quality Control	89	12.9%	2,072
Account Management	84	12.2%	1,937
Quality Assurance	67	9.7%	2,148
Facilities/Engineering	58	8.4%	2,285
Marketing	48	7.0%	2,158
IT	40	5.8%	2,213
Product Development	34	4.9%	1,965
Sales	20	2.9%	1,956
Creative	19	2.8%	2,126
Other (10 depts)	90	13.1%	2,177
Total	689	100%	2,068

1

Salary

Benchmarking by Department

Department	Avg Monthly (\$)	vs. Avg
Human Resources	2,556	+23.6%
Environmental Compliance	2,508	+21.3%
Training	2,362	+14.2%
Facilities/Engineering	2,285	+10.5%
Major Mfg Projects	2,242	+8.4%
<i>(Organisation Average)</i>	<i>2,068</i>	—
Product Development	1,965	-4.9%
Sales	1,956	-5.4%
Account Management	1,937	-6.3%
Manufacturing Admin	1,921	-7.1%
Research Center	1,887	-8.8%

1

Competitive Analysis

1

Salary

Distribution

Monthly salaries range from **\$703** to **\$3,450**, with a mean of **\$2,068** and median of **\$2,050**. The near-identical mean and median indicate a broadly symmetric distribution with limited outlier effect.

Salary Band	Employees	Share
Less than \$1,000	13	1.9%
\$1,000–\$1,500	108	15.7%
\$1,500–\$2,000	183	26.6%
\$2,000–\$2,500	287	41.7%
Greater than \$2,500	98	14.2%

The majority of employees (41.7%) fall within the \$2,000–\$2,500 band, suggesting a compressed mid-market pay structure.

1

Compensation

by Job Level

Job Level	Employees	Share	Job Rate
Principal	215	31.2%	5.0
Senior	208	30.2%	3.0
Lead	124	18.0%	4.5
Mid	72	10.5%	2.0
Junior	70	10.2%	1.0

A notable finding is that over 61% of the workforce is at Senior or Principal level. This top-heavy seniority distribution may indicate effective retention of experienced staff, or conversely, limited entry-level pipeline development.

1

Gender

Pay Equity

Gender	Avg Monthly (\$)	Avg Annual (\$)	Gap vs. Male
Male	2,073	24,876	—
Female	2,059	24,708	\$14/mo (0.7%)

The gender pay gap of **\$14/month (0.7%)** is statistically negligible and reflects equitable pay practices. This is a positive indicator for the organisation’s DEI posture.

1

Overtime & Leave Analysis

1

Overtime Patterns

Attention: 7.5% of employees (52 people) logged more than 50 overtime hours, flagged as high-risk for burnout. The *Major Mfg Projects* department averages **38.6 overtime hours per employee** — nearly double the second-highest department.

Department	Avg OT Hours	Risk Level
Major Mfg Projects	38.6	High
Manufacturing Admin	26.0	High
Training	24.1	High
Sales	23.3	High
Quality Control	19.1	Medium
IT	15.1	Medium
Research/Development	12.4	Medium
Manufacturing	11.8	Medium
Quality Assurance	9.3	Low
Marketing	7.6	Low

1

Leave Utilisation

Leave Type	Affected Staff	Rate
Sick Leave	319	46.3%
Unpaid Leave	148	21.5%

The sick leave rate of 46.3% is markedly elevated. While single-day absences may inflate this figure, it is recommended that HR investigate whether this reflects a systemic health, morale, or work-environment issue — particularly given the high overtime levels in several departments, which may contribute to burnout-related absences.

1

Tenure & Retention Analysis

1

Tenure

Distribution

Tenure (yrs)	Employees	Share	Avg Salary (\$)
0	82	11.9%	2,095
1	210	30.5%	2,092
2	180	26.1%	2,070
3	126	18.3%	2,025
4	67	9.7%	2,045
5	24	3.5%	2,040
Total	689	100%	2,068

68.4% of employees have 2 years or fewer tenure. Two interpretations are plausible: (1) the organisation has grown significantly in 2019–2020, or (2) employee attrition is high among staff beyond 2 years. The sharp drop-off after Year 2 (180 → 126 → 67) warrants investigation.

1

Salary

Growth by Tenure

Salary shows a **modest inverse trend** with tenure — employees at 0–1 year earn slightly more (\$2,092–\$2,095) than those at 3–5 years (\$2,025–\$2,045). This counter-intuitive pattern could reflect:

- Market-rate increases in newer hiring cohorts not yet applied to tenured staff.
- Salary compression: long-tenured employees on fixed bands not keeping pace with market.
- Department mix differences between cohorts.

A targeted salary review for 3+ year employees is recommended to address potential retention risk.

1

Recommendations

- 1. Investigate sick leave drivers.** A 46.3% sick leave rate is significant. Survey affected departments, cross-reference with overtime data, and consider introducing an Employee Assistance Programme (EAP) or wellness initiatives, particularly in high-overtime teams.
- 2. Address overtime in Major Mfg Projects and Manufacturing Admin.** Departments averaging 26–39 overtime hours present a burnout and attrition risk. Consider hiring reviews, workload redistribution, or project timeline adjustments.

3. **Review salary progression for tenured staff.** The slight salary compression visible at 3–5 years may discourage long-term retention. An annual salary benchmarking exercise aligned to external market rates is recommended.
4. **Strengthen entry-level pipeline.** With only 10.2% of staff at Junior level and 61% at Senior/Principal, the organisation risks a talent gap when senior staff retire or depart. Structured graduate intake or mentorship programmes should be explored.
5. **Monitor gender representation by seniority.** While the overall gender pay gap is negligible, the 65/35 male-to-female ratio should be examined at the department and seniority level to identify any structural barriers to advancement.
6. **Investigate tenure cliff at Year 2.** The headcount drop from 180 (Year 2) to 126 (Year 3) and 67 (Year 4) is steep. Exit interview data should be analysed to understand whether attrition spikes at the 2-year mark and what interventions could improve retention.

1

Appendix

Data Notes

- **Reference Date:** All tenure calculations use January 1, 2021 as the reference date.
- **Tenure Fix:** 30 records with start dates in early January had their **Years** field corrected to match the rounded tenure calculation from **Start Date**.
- **High Overtime Flag:** Defined as >50 overtime hours per employee.
- **Salary Consistency:** All 689 records confirmed — Annual Salary equals Monthly Salary $\times$ 12 with zero discrepancies.
- **No Missing Values:** Dataset is complete with no null values across all 15 original columns.
- **Job Rate to Level Mapping:** 1.0 $\rightarrow$ Junior, 2.0 $\rightarrow$ Mid, 3.0 $\rightarrow$ Senior, 4.5 $\rightarrow$ Lead, 5.0 $\rightarrow$ Principal.
